

We stock a wide range of essential fire sprinkler system accessories and spare parts.

The following are standard stock items:

- **Galvanised orifice unions**, with brass orifice plate (3mm standard, but orifice to your requirement); sizes ½" to 2"
- **Potter flow switches**, VSR vane-type alarm switch with retard; UL listed, FM and LPC approved; sizes 1"/25mm to 6"/150mm
- **Circular window sight glasses**, providing low cost level indication; high temperature and pressure applications with flat quality glass, internal reflector and shock cushioned; sizes ½"/15mm to 2"/50mm

Accessories & Spares

The following can be ordered for fast delivery:

- **Brass orifice plates**, 3mm (50-150mm NB) or 6mm (50-200 NB) data stamped to your requirements
- **Potter flow switches** other than our standard VSR type, generally within 1-3 days
- **Flow meters** such as Firesure flanged or grooved
- **Pipework-to-go**, any configuration to your requirement; for instance this custom compact board-mounted test rig for both air and water pressure testing

Please contact us with your requirements – we pride ourselves on our responsiveness, flexibility and quality and are therefore happy to source whatever you require wherever possible – quickly and at the best price.
